

JOEL E. BOUSLEY : WEB DEVELOPER • WEB DESIGNER : *blending web design and development since 1998*

OBJECTIVE:

To obtain a position that challenges me to blend web development and design technologies within a cutting-edge and savvy company.

EXPERIENCE:

Senior Web Developer/Designer | 05/2008 - 02/2009 | Vigilant Services

- Worked on the design and development of www.afterdeployment.org -- a site composed of more than 500 pages.
- Oversaw and guided the development of work completed by subcontractors and junior- and mid-level developers and designers.
- Created static and dynamic content for all forms of web and multimedia products.
- Guided the development and design process from concept to completion.
- Created a design and development style guide for use internally and by subcontractors.
- Mentored junior- and mid-level developers and designers.
- Creative design involved: static and interactive animations that incorporate video, photography and other graphics.
- Relayed new ideas to those who might not have been familiar with web and multimedia concepts.
- Technologies Used: XHTML, XML, HTML, CSS, JavaScript, PHP, MySQL, ActionScript, Photoshop, Illustrator, Flash, Section 508.

Web Developer | 08/2007 – 03/2008 | Southern Nevada Water Authority, Contractor

- Led the redesign of an intranet (in excess of 250 pages) in accordance with corporate culture below budget and ahead of schedule.
- Wrote custom programs and scripts to allow users to be able to interact with the website without the need to ask for assistance.
- Led and guided focus groups by conducting interviews, group exercises, and questionnaires.
- Defined the scope of development for dynamic content through the use of a database-driven back-end.
- Used a Content Management System for testing, debugging, and launching processes.
- Developed, reviewed, and integrated new web pages, graphics and other elements.
- Designed screens, menus, navigation tools, and report formats to fit into existing corporate culture.
- Developed help documentation for previously developed applications.
- Technologies Used: ColdFusion, XHTML, XML, HTML, CSS, JavaScript, PHP, XML, Oracle, SQL, ActionScript, Photoshop, Illustrator, Flash.

Web Developer/Designer | 11/2001 - 05/2008 | Enliven Studios

- Used a variety of technologies to script, design, develop and program web sites of varied sizes for small businesses.
- Ensured that websites were easy to navigate and met the needs of both the client and their potential customers.
- Designed and developed custom multimedia products for clients ranging from presentations to 2D/3D animation sequences.
- Created branding to include business cards, brochures, logos, and other media.
- Project management to achieve optimized results based on adherence to a budget and milestones.
- Researched and evaluated new multimedia and web technologies to offer the best solutions to clients.
- Technologies Used: ColdFusion, XHTML, XML, HTML, CSS, JavaScript, PHP, ASP.NET, XML, Oracle, SQL, ActionScript, Photoshop, Illustrator, Flash, After Effects, 3D Studio Max, Lightwave 3D, Quark X-Press, InDesign.

Visual Information Specialist | 08/2006 - 05/2007 | Department of Defense, Temporary Employment

- Acted as an adviser for the design, development, and use of multimedia products and equipment.
- Briefed others on the use of multimedia assets and services.
- Created animations and presentations based on storyboards and subject matter expert specifications.
- Modeled complex real-world objects such as aircraft, buildings, and organics.
- Created special effects based on physics such as explosions and projectile munitions.
- Served as a client support administrator for hardware and software related issues.
- Edited material for clarity of presentation and grammatical accuracy and syntax.
- Technologies Used: XHTML, CSS, JavaScript, ActionScript, Photoshop, Illustrator, Flash, After Effects, 3D Studio Max, Lightwave 3D.

3D Artist & Animator | 03/2006 - 08/2006 | Tchrizon

- Created 2D art and 3D geometry based on observation of real-world objects and conditions and modeled detailed real-world-based environments.
- Researched, selected, and produced 2D/3D material using the most cost effective methods available.
- Created special effects to simulate snow, fog, storms, explosions, and other particle systems.
- Worked in conjunction with military advisers to simulate a real-time war environment for soldiers.
- Technologies Used: XHTML, CSS, JavaScript, Photoshop, Illustrator, Flash, After Effects, 3D Studio Max, Lightwave 3D, Poser

Multimedia Developer | 05/2004 - 03/2006 | Tchrizon

- Spearheaded development of multiple online operator guides spanning more than several hundred pages.
- Developed multimedia applications using object-orientated programming methodology and the principles of multimedia design.
- Collaborated with other developers to assess training requirements, design lesson maps, and develop storyboards.
- Wrote technical specifications and reports for internal documentation and customer reference.
- Edit and wrote technical articles and other materials to communicate clearly and effectively.
- Modeled and animated 3D military hardware, vehicles and terrain based on customer specifications.
- Designed interactive and challenging computer based training on a twelve month rotational cycle.
- Technologies Used: XHTML, CSS, JavaScript, PHP, MySQL, ActionScript, Photoshop, Illustrator, Flash, After Effects, Premiere Pro, Microsoft Visio, 3D Studio Max, Lightwave 3D, Section 508

JOEL E. BOUSLEY : WEB DEVELOPER • WEB DESIGNER : *blending web design and development since 1998*

Tactical Data Systems Sergeant | 11/1999 - 02/2004 | U.S. Army

- Supervised the setup and maintenance of an operations and communications network.
- Established communications network for computer systems. Analyzed computer/network issues.
- Initiated communications with analog/digital subscribers, and database construction and maintenance.
- Coordinated information with meteorological teams, advance party, and cannon crew members.
- Installed system hardware and software in both Legacy, Unix, and Windows environments.
- Supervised compliance with Department of Defense rules, guidelines, and regulations in real-world and computer networks.
- Technologies Used: Unix Computer Systems, SQL Databases.
